فهرست مطالب

راهکارهای جستجو در پایگاه های اطلاعاتی

جستجو در پایگاه اطلاعاتی Pub Med

جستجو در پایگاه اطلاعاتی Science direct

راهکارهای جستجو

- انتخاب کلیدواژه یا کلیدواژه های مناسب

• Stop words ← And, an, a, the

- کوتاه سازی:

□ علامت (*): نوشتن ریشه و یا چند کاراکتر از یک کلیدواژه و قرار دادن علامت * در سمت راست آن

✓ مثال: Islam ← Isl* ← Islamic, Island, islet و ...

□ علامت (?): نوشتن ریشه و یا چند کاراکتر از یک کلیدواژه و قرار دادن علامت ؟ در سمت راست آن

✓ مثال: Islam ← Isla? ← Islam, Islas و ...

راهکارهای جستجو

- نوشتن عبارت جستجو در داخل “”

✓مثال ← “Management information Systems”

- نوشتن عبارت جستجو در داخل {}

✓مثال ← {Management information Systems}

انواع عملگرها

عملگرهای همجواری

PER/n

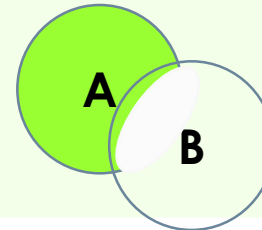

مثال
A **PER/5** B

W/n

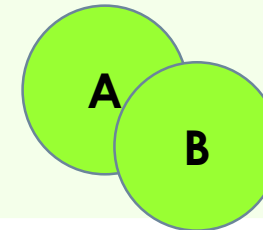

مثال
A **W/12** B

عملگرهای بولی

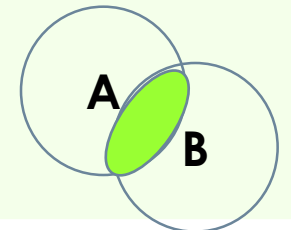

NOT

OR

AND

راهکارهای جستجو

- نکته: $A \text{ PRE/O } B = "AB"$
- استفاده از پرانتز () ← مثال: Management AND (Information OR Systems)
- استفاده از تلفظ انگلیسی حروف یونانی ← مثال: πr ← Pr
- نوشتن زیرنویس و بالانویس کلمات در یک خط، مثال: πr^2 ← Pr^2

پایگاه اطلاعاتی

پابمد محیطی است که توسط مرکز ملی اطلاعات بیوتکنولوژی واقع در کتابخانه ملی پزشکی آمریکا در سال ۱۹۹۶ برای جستجوی کاربران در مجموعه پایگاههای اطلاعاتی خود، فراهم شده است.

پابمد دارای بیش از ۲۷ میلیون سند از پایگاه Medline، ژورنالهای حوزه علوم زیستی و کتاب در رشته های پزشکی، دندانپزشک، پرستاری، دامپزشکی و علوم پایه (بالینی) است که در بیش از ۷۰ کشور جهان منتشر می شود. اطلاعات پابمد به صورت هفتگی روزآمد می شود.

از طریق این محیط میتوان به اطلاعات کتابشناختی مقالات و خلاصه آنها (در صورت موجود) دسترسی یافت. همچنین در صورت وجود متن کامل مقاله به صورت رایگان در PMC و یا دارا بودن اشتراک مجله از طریق وب سایت ناشر، امکان دریافت متن کامل مقاله نیز فراهم شده است.

Abstract

The COVID-19 pandemic has become an urgent issue in every country. Based on recent reports, the most severely ill patients present with coagulopathy, and disseminated intravascular coagulation (DIC)-like massive intravascular clot formation is frequently seen in this cohort. These tests may be considered useful to discriminate severe cases of COVID-19. The clinical COVID-19-associated coagulopathy is organ dysfunction primarily, whereas hemostatic abnormalities are less frequent. Changes in hemostatic biomarkers represented by increase in D-dimer and fibrin/fibrinogen degradation products indicate the essence of coagulopathy is not only clot formation. In comparison with bacterial-sepsis-associated coagulopathy/DIC, prothrombin time, and activated partial thromboplastin time, and decrease in antithrombin activity is less frequent and thrombocytopenia is relatively uncommon in COVID-19. The pathogenesis of coagulopathy are not fully elucidated, however. It is speculated that the dysregulation of immune responses orchestrated by inflammatory cytokines, lymphocyte cell death, hypofibrinolysis, and endothelial damage are involved. Bleeding tendency is uncommon, but the incidence of thrombosis is increasing, and the adequacy of current recommendations regarding standard venous thromboprophylaxis are uncertain.

Keywords: COVID-19; anticoagulant; coagulopathy; coronavirus; disseminated intravascular coagulation.

Neoplasms

1. New abnormal growth of tissue. Malignant **neoplasms** show a greater degree of anaplasia and have the properties of invasion and metastasis, compared to benign **neoplasms**.
Year introduced: /diagnosis was NEOPLASM DIAGNOSIS 1964-1965

Hereditary Breast and Ovarian Cancer Syndrome

2. Autosomal dominant **HEREDITARY CANCER SYNDROME** in which a mutation most often in either **BRCA1** or **BRCA2** is associated with a significantly increased risk for breast and ovarian cancers.
Year introduced: 2012

Early Detection of Cancer

3. Methods to identify and characterize **cancer** in the early stages of disease and predict tumor behavior.
Year introduced: 2009

National Cancer Institute (U.S.)

4. Component of the **NATIONAL INSTITUTES OF HEALTH**. Through basic and clinical biomedical research and training, it conducts and supports research with the objective of **cancer** prevention, early stage identification and elimination. This Institute was established in 1937.
Year introduced: 2008

Cancer Vaccines

5. Vaccines or candidate vaccines designed to prevent or treat **cancer**. Vaccines are produced using the patient's own whole tumor cells as the source of antigens, or using tumor-specific antigens, often recombinantly produced.
Year introduced: 1997

Chemotherapy, Cancer, Regional Perfusion

6. Neoplasm drug therapy involving an extracorporeal circuit with temporary exclusion of the tumor-bearing area from the general circulation during which high concentrations of the drug are perfused to the isolated part.

پایگاه اطلاعاتی

Elsevier یکی از اولین ناشرانی است که از سال ۱۵۸۰ به چاپ و انتشار مجلات و منابع علمی پرداخته است و هم اکنون یکی از معتبرترین پایگاه های اطلاعات علمی جهان به نام Science Direct را منتشر می نماید.

Science Direct یک پایگاه اطلاعاتی علمی تمام متن است که شامل تقریباً ۲۵۰۰ مجله علمی، بیش از ۳۰.۰۰۰ کتاب و حدود ۱۳.۳۹۷.۵۶۱ مقاله علمی می باشد که هر ساله حدود نیم میلیون منبع اطلاعاتی نیز به آن افزوده می شود و همچنین امکان جستجو و مرور در لیست کتاب ها، مجلات، آثار مرجع و عکس در این پایگاه وجود دارد.

The screenshot shows the top navigation bar of the ScienceDirect website. It includes the ScienceDirect logo, a search bar with the text "Search for peer-reviewed journals, articles, book chapters and open access content.", and a user profile section with the name "r Alizadeh" and a "Logout" button. A purple bracket highlights the user profile section. Below the search bar, there is a large banner image with a colorful, abstract pattern. A text box on the banner reads: "Gluconeogenesis is the process that leads to the generation of glucose from a variety of sources such as pyruvate, lactate, glycerol, and certain amino acids." Below this text box is a button that says "Learn about gluconeogenesis >".

The screenshot shows the ScienceDirect homepage. At the top, there's a navigation bar with the ScienceDirect logo and a search bar. Below the search bar, there's a large banner with a colorful abstract image and a text box about gluconeogenesis. The main content area is titled "Explore scientific, technical, and medical research on ScienceDirect" and lists various scientific fields. There are also sections for "Popular Articles" and "Recent Publications".

Annotations on the screenshot:

- A red box highlights the user profile icon and the name "Alizadeh".
- A blue box highlights the "سازمان مخ یاب" (Organization Finder) button.
- A pink speech bubble points to the "نام کاربری" (Username) field.

در این قسمت می توانید یک یا
چند کلیدواژه را در فرمولبندی
خود استفاده کنید

برای مثال مقالات مرتبط با
پژوهش های حمله قلبی را
جستجو کنیم

Search 

عملگرهای بولی

AND: برای ترکیب دو مفهوم است و در صورتی که بین دو کلیدواژه در عبارت جستجو قرار گیرد، رکوردهایی را بازایی می نماید که هر دو کلیدواژه را با هم داشته باشد.

OR: جهت ترکیب کلیدواژه های مشابه به کار می رود و رکوردهایی را بازایی می کند که یک یا هر دو کلیدواژه را در خود داشته باشد.

Not: برای جدا کردن و کنار گذاشتن یک کلیدواژه به کار می رود و هر گاه بین دو کلیدواژه به کار رود، رکوردهایی را بازایی می نماید که کلیدواژه اول را شامل و کلیدواژه دوم را نداشته باشد.

سایر عملگرهای SCIENCE DIRECT

❶*: این کارکتر در کلیدواژه مورد جستجو، جایگزین یک یا چند حرف می شود و کلیدواژه را با املاي گوناگون آنها بازیابی می کند به عنوان مثال $m*n$ کلمات **man** و **men** را بازیابی می کند.

❷!: با اضافه کردن این کاراکتر به پایان کلیدواژه یا کلیدواژه ها، کلیه کلماتی که از لحاظ املاي ریشه یکسانی با کلیدواژه مربوطه دارند بازیابی می شوند. مثل **Educate!** برای **Educator** و **Education** و **Educative** و ...

❸": زمانی که بخواهید یک عبارت دقیقا جستجو شود از این عملگر استفاده می نمایید. به عنوان مثال **"Heart Attack"**

❹ برای جستجوی کلیدواژه های بالانویس و زیرنویس آنها را در یک خط یکسان وارد کنید. مثل H_2O که به صورت **H2O** وارد نمایید.

Is the omega-3 index associated with intestinal membrane phospholipid EPA+DHA content?

Prostaglandins, Leukotrienes and Essential Fatty Acids, Volume 91, Issue 3, September 2014, Pages 87-96

Eric A. Gurzell, Jason A. Wesinger, Christina Morkam, Sophia Hemmrich, ... Jenifer I. Fenton

Download PDF Abstract Export

Background

An Omega-3 Index (O3I; EPA+DHA as a % of erythrocyte total fatty acids) in the desirable range (8%-12%) has been associated with improved heart and brain health.

Objective

To determine the combination of fish intake and supplement use that is associated with an O3I of >8%.

Design

Two cross-sectional studies comparing the O3I to EPA+DHA/fish intake.

Participants/setting

The first study included 28 individuals and assessed their fish and EPA+DHA intake using both a validated triple-pass 24-hr recall dietary survey and a single fish-intake question.

The second study used de-identified data from 3,458 adults (84% from US) who self-tested their O3I and answered questions about their fish intake and supplement use.

Statistical analyses performed

Study 1, chi-squared, one-way ANOVA, and Pearson correlations were computed. In Study

Prostaglandins, Leukotrienes and Essential Fatty Acids

Volume 142, March 2019, Pages 4-10

Association of reported fish intake and supplementation status with the omega-3 index

K.H. Jackson ^a, J.M. Polreis ^a, N.L. Tintle ^b, P.M. Kris-Etherton ^c, W.S. Harris ^{a, d}[Show more](#)^a OmegaQuant, LLC, 5009W. 12th St., Suite 8, Sioux Falls, SD 57106, United States^b Department of Mathematics and Statistics, Dordt College, Sioux Center, IA, United States^c Department of Nutritional Sciences, The Pennsylvania State University, University Park, PA, United States^d Sanford School of Medicine, University of South Dakota, Sioux Falls, SD, United States

An Omega-3 Index of >8% is associated with lower cardiovascular risk.

- Consuming oily fish and/or taking omega-3 supplements will raise the Omega-3 Index.
- Based on self-reported data, it appears that on average >2 oily fish meals per week plus an omega-3 supplement are required to achieve an Index of >8%.

Abstract

Background

An Omega-3 Index (O3I; EPA+DHA as a % of erythrocyte total fatty acids) in the desirable range (8%-12%) has been associated with improved heart and brain health.

Highlights

- An Omega-3 Index of >8% is associated with lower cardiovascular risk.
- Consuming oily fish and/or taking omega-3 supplements will raise the Omega-3 Index.
- Based on self-reported data, it appears that on average >2 oily fish meals per week plus an omega-3 supplement are required to achieve an Index of >8%.

Abstract

Heart disease is the most common cause of maternal death in industrialized nations, sudden arrhythmic death, myocardial dysfunction, **coronary disease** and **aortic dissection** being the most frequent underlying causes. Other particularly high-risk conditions include severe valvar stenosis, **mechanical heart valves** and pulmonary arterial hypertension. Pregnancy and **childbirth** exert **physiological stress** on the circulation, so women whose heart condition limits their ability to increase cardiac output are at high risk. Women of childbearing potential who have heart disease should be made aware that pregnancy can carry a high risk, and should be offered safe and
